DATAWORKS³

easy

Ricoh Dataworks³ for Healthcare

Fast, Accurate Production

Dealing with paperwork is a constant challenge for acute and ambulatory healthcare organizations. Dataworks³ for Healthcare from RICOH® helps providers bring speed and accuracy to two of the most common examples: labels and forms. This software pulls patient information directly from the health information system (HIS) and prints pre-populated labels and forms whenever and wherever you need them.

Print chart and flag labels with built-in templates.

Convenient Label Printing

Eliminate the need to write labels by hand. Dataworks³ for Healthcare includes templates staff can use to print a variety of labels and patient wristbands with just a few simple clicks.

- Reduce the risk of errors by drawing patient information directly from the HIS.
- Ensure accuracy for every label. Out-of-the-box templates in the Dataworks³ for Healthcare application are formatted to match brand name labels.
- Create chart labels in admissions, lab and pharmacy.
- Produce flag labels for prescription bottles in the pharmacy or for sample bottles and vials in the laboratory.
- Generate patient wristbands that feature the patient's name and other demographic data, as well as a barcode for tracking.
- Design new templates for the labels you already use. Dataworks³ for Healthcare offers an intuitive interface that is easy for anyone to master, regardless of experience.
- Print directly on flat envelopes for custom-labeled patient packs.

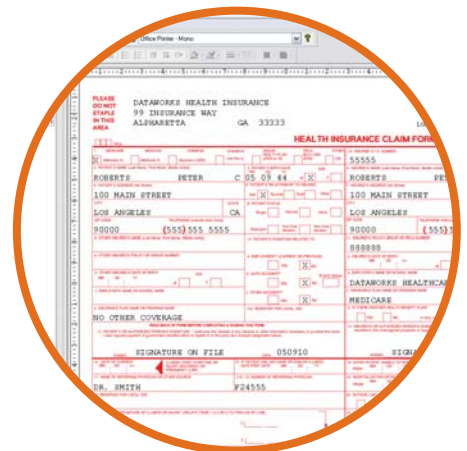

Issue patient wristbands that include demographic data pulled directly from the HIS.

On-Demand Forms Printing

With Dataworks³ for Healthcare, providers can print any form instantly, eliminating the time and costs typically associated with pre-printed forms.

- Replace pre-printed forms with electronic forms, which can be printed in small batches as needed and support sustainability efforts by reducing waste.
- Remove the need for admissions, nursing stations and other departments to organize, manage and update stacks of paper forms or place orders when current inventory is depleted.
- Pre-populate forms with patient data pulled from the HIS. This not only improves accuracy, it saves valuable time and ensures a more convenient patient experience.
- Implement changes immediately. Dataworks³ for Healthcare makes it fast and cost-effective to edit forms when new policies or procedures are introduced.
- Add barcodes to any form for automated tracking and patient identification.
- Get rid of time-consuming "blue card" technology for impressing forms with patient information.
- Drive high-volume custom printing in a centralized reprographics department (CRD) or on-site print shop to personalize mailings, marketing materials and other documents with variable data pulled directly from the HIS.

Dataworks³ for Healthcare eliminates the need to print, manage, warehouse or transport pre-printed forms.
