

Nuance® eCopy ShareScan™ v6

Simplified scanning & document capture

You've invested a lot of time and resources into your workplace technology, but are you getting the most value from your MFPs and other investments? What about on-the-go workers who experience roadblocks when it comes to interacting with your established workflows from their mobile devices? Nuance® eCopy ShareScan™ version 6 can give you the tools to dramatically improve both the versatility of your multifunction printers and the mobility of your document capture processes — making it easier to deploy, administer and secure document capture workflows.

eCopy ShareScan is easy to deploy and easy to use. Administrators can get the solution up and running in a matter of minutes. Users can create personalized workflows for their specific needs with little or no training, connecting to an expanding portfolio of business applications from the MFP or from their mobile devices. In addition to being easy to use, eCopy ShareScan offers security, scalability and high availability as core strengths — streamlining and securing document-centric business processes with room to grow as your organization does.

New in eCopy ShareScan v6

- Extensive mobile capabilities
- Personalized workflows
- Auto-populated PDF forms
- Expanded file and language support
- High availability infrastructure
- Enhanced security
- And more! (See page 3 for details)

eCopy ShareScan v6 advantages

Multifunction Printer
Personalized workflow buttons make scanning, converting and routing documents consistent and fast

Scan Station
Accessible PC-based kiosk with full size keyboard for secure network scanning applications

Mobile
Capture documents with the mobile camera, add data with form overlay capabilities and have customers sign documents

Desktop
eCopy PDF Pro Office lets you create 100% industry-standard PDF files directly from any PC application that can print

eCopy ShareScan
Versatile and productive, no matter where you work

Accessible digital information

Do you ever find yourself clicking “save as” or making copies of a document so you can access it while traveling or out in the field? Save paper, save time and save the headache with easy access to the latest information — from anywhere. With eCopy ShareScan, your documents and data are converted to accessible electronic files, so users can access digital copies of their information from backend systems or devices at any time.

Productivity and reduced expenses

Maintaining physical documentation takes a lot of time and effort. eCopy ShareScan can help you streamline inefficient workflows by cutting down on cumbersome manual labor. Trade unorganized data for searchable, easily retrieved files, save steps in scanning and reduce the costs associated with traditional document management.

Enhanced security

eCopy ShareScan offers enhanced security features for sensitive information that can help you meet compliance regulations. eCopy ShareScan enables secure session log-on and provides access to the secure company directory, network folders and email address books. Content-based security warnings monitor scanned documents, flag classified content and can be set to send email alerts to administrators. eCopy ShareScan uses TLS 1.2 for client-server communications, as well as SNMP v3. eCopy ShareScan’s enterprise-grade communications security protocols help large organizations meet demanding security policies.

Mobile data capture

Workers are on-the-go more than ever before, but traditional data capture methods are still tethered to office hardware. With eCopy ShareScan, you can expand your capture universe to include mobile devices — offering flexibility while aligning with your office’s accountability, cost allocation and security policies.

Simple deployment

Because eCopy ShareScan is scalable, you can choose to expand its capabilities as your needs grow. Whether your firm is a small business, mid-size corporation or large enterprise, eCopy ShareScan gives you a wide range of deployment and licensing options. Because it was designed with headroom to grow, it’s easy to go from just the basics to fully capable.

Use with eCopy PDF Pro Office

Want even more productivity? eCopy PDF Pro Office serves as a companion to eCopy ShareScan for scanning from an MFP to your desktop — letting you create PDF files and forms from many sources.

What's new?

Nuance Business Connect

eCopy ShareScan now integrates with Nuance Business Connect — a user-based ShareScan license that includes a mobile app to extend the use of your mobile devices. By making “anytime, anywhere” access to dynamic workflows integral to the ShareScan experience, Nuance Business Connect puts the value of mobile capture front and center — not as an afterthought. This means that you can give on-the-go workers access to the ShareScan workflows they need to be productive from their mobile devices while traveling or out in the field.

The power of productivity

With the Visual Workflow Editor, all workflow settings are now available through an intuitive graphical editor — improving your ability to streamline the workflow creation process. It also gives your users the power to create personalized workflows by modifying/configuring connector buttons tailored to their preferences (requires Quick Connect connector). The User Profile Assistant (RapPID) features “remember me” user preferences to pre-fill workflow settings based on the user’s previous settings. This helps increase user adoption and productivity, provides consistency and expands workflow options — all without major IT intervention.

Form Overlay Extender

The Form Overlay Extender automatically populates PDF templates with data manually entered by the user or extracted during the workflow. This allows user-entered data to populate predefined PDF forms to accompany an attached file — allowing on-the-go workers to route detail-rich forms to the workflows and systems that need them.

Expanded file support

eCopy ShareScan now enables Rich Text File (RTF) format output — which is known for its cross-platform document interchange capabilities and its resistance to viruses. This gives you a format for text and graphics

interchange that can be used with different output devices, operating environments and systems. You can also enjoy the benefits of expanded PDF/A options, including enhancements to the PDF/A feature through the CSDK 20.1 — which increases the support of seven additional PDF/A levels and supports document archiving and preservation.

Expanded language support

We’ve expanded language support for the device user interface to include simplified Chinese and Japanese. This not only expands the global profile of eCopy ShareScan, but it also allows Chinese and Japanese speaking users to work in their native language. The OmniPage OCR engine now also features Arabic language support, including the ability for Arabic language documents to be text-searchable.

Enhanced image processing

With OmniPage Capture SDK 64-bit integration, you can enable CSDK RAM utilization beyond 4GB for capture workflows. This extends your capabilities to handle very large images generated by documents such as color A3 600DPI — providing integrated memory management. Updated barcode engines and enhanced barcode recognition give you greater stability for larger file sizes and additional support for more barcode types.

High availability

When you deploy eCopy ShareScan, you can enjoy peace of mind from its high availability features. These include support using industry standard hardware load balancers — such as Citrix® NetScaler — along with increased server performance during the capture process.

New in eCopy ShareScan v6:

Mobility enhancements

- Nuance Business Connect

Productivity enhancements

- Visual workflow editor
- Personalized workflow
- Form overlay extender
- User profile assistant (RapPID)

Versatility enhancements

- Scriptable workflow (PS required)
- RTF format output
- Arabic OCR
- Expanded user interface language support
- Expanded PDF/A options

Performance enhancements

- Hardware load balancer support / high availability
- Content-based security alerts
- Security enhancements OmniPage
- Capture SDK 64-bit integration
- 64-bit ScanStation
- Updated barcode engines

Custom connections to backend systems:

Scriptable Workflow* is a professional services delivered feature that enables custom scripts to expand workflow capabilities and connectivity to virtually any backend system — providing improved workflow efficiencies and expanded connectivity options.

* Requires Nuance professional services

eCopy ShareScan Specifications

Operating Systems

- Windows® 7 SP1 Home Premium, Professional and Ultimate Editions
- Windows 8.1
- Windows 10 Anniversary Update or later
- Windows Server 2008 R2 SP1*
- Windows Server 2012 R2*
- Windows Server 2016
- The ShareScan Administration Console and the ShareScan Manager cannot be installed on Linux, Solaris or Macintosh® operating systems.

* 64 bit support as a 32 bit application

Note: The ShareScan 6.0 installer cannot be launched unless .NET Framework 4.6.2 is installed on the target system.

Database

- SQL server 2008 or above, Express and non-Express Editions

Virtual Environments

- VMware® ESX Server 4.x and 5.x
- VMware Workstation 7.x, 8.x, 9.x, 10.x, 11.x and 12.x
- Microsoft® Hyper Visor (Hyper-V) Server 2012

Important! Installing eCopy ShareScan on a virtual machine with a Microsoft operating system has always been supported but Nuance does not certify virtual platforms. As long as adequate resources are allocated to the virtual machine, eCopy ShareScan should function as expected.

Memory Configuration

- 4GB physical memory (minimum); 6GB recommended (8GB recommended for systems using 100+ MFPs)
- 5GB disk space (including SQL server and prerequisites)
