Does This Sound Like Your Current Situation?

When an eDiscovery request comes into your company, everyone goes on high alert as you scramble for information. First comes the time-consuming and expensive process of sifting through volumes of unstructured, electronic data that resides on network drives, personal computers and mobile devices. Then comes your very real security concerns because chances are the information being requested is highly sensitive. All of this leaves you wondering how you can reduce costs, streamline processes and help ensure security in this age of ever stricter eDiscovery mandates.

Ricoh makes in-house eDiscovery fast and easy.

**Your Challenge: Rising Cost of eDiscovery**

**Our Solution:** Ricoh can implement a simple but robust in-house solution that can reduce costs by eliminating expensive third-party services, dedicated hardware and software, and drawn-out project times.

**Your Challenge: Difficult Implementation**

**Our Solution:** Poorly designed or non-existent eDiscovery solutions can drain your productivity and resources. Our simple-to-use network appliance is easy to install, integrates with many existing review tools and hosting services, and is ready for deployment as needed. This subscription based solution means there is no capital investment needed. Customers can subscribe for a defined period of time or on an as-needed basis.

**Your Challenge: Stringent eDiscovery Requirements**

**Our Solution:** Now you can access the information you need while meeting security and compliance requirements. Performing eDiscovery tasks from within your firewall helps insure your sensitive information remains secure and protected.
