RICOH eDiscovery On Demand

RICOH
imagine. change.

With increased pressure to do everything faster and more cost effectively, legal professionals are turning to the secure cloud to maximize their eDiscovery process now more than ever.

Full Control Over the eDiscovery Process

RICOH eDiscovery On Demand powered by VenioOne is a user-friendly, secure cloud-based solution that allows you to fully control the eDiscovery process. You can select the services you want and upload Electronically Stored Information (ESI) for processing, analysis, review and production. You'll receive notifications as your projects move through the automated production workflow, and with our powerful new analysis and review functionality, you can now interact with and filter your documents for greater insight and maximum efficiency.

Web-Based Access Anywhere, Anytime

As a web-based solution, eDiscovery On Demand is available to you 24 hours a day, 7 days a week, 365 days a year. You'll have full access to the services you need from anywhere you can get online. And, by creating custom templates, you can standardize your eDiscovery process around the globe.

Secure eDiscovery in the Cloud

We know that legal professionals are held to the highest levels of security, yet still want to experience the mobility and flexibility of the cloud. That's why eDiscovery On Demand is hosted within the industry leading Microsoft® Azure™ environment. Not only is your data encrypted as it moves over the network, but also while it resides (or rests) in storage – reducing the need to worry about confidentiality.

Why eDiscovery On Demand?

- Anywhere, anytime availability
- Easy-to-use user interface
- Industry leading security in the Microsoft® Azure™ Cloud
- Automatic alerts and status updates
- Data analysis and review functionality

VenioOne

RICOH eDiscovery On Demand

Information On Demand

Instead of flipping between multiple systems, RICOH eDiscovery On Demand allows you to get the answers you need within one easy-to-navigate user interface. Simply login to view your dashboard for a quick snapshot of key information about your data, including visual representations and status summaries, or dig deeper with data analysis and detailed reports.

Analysis and Review

eDiscovery On Demand gives you the ability to leverage powerful technology to analyze, search and review your data before production. The intuitive workflow lets you efficiently reduce the data set. Filter by keywords, date, file type, and duplications, so that only the most relevant documents are produced.

> **Our easy-to-use and intuitive workflow provides access to leading technologies without any overhead investment.**

Alerts and Status Updates

Set up automatic alerts and receive up-to-the-minute notifications on your projects as they move through the eDiscovery process.

Hosted eDiscovery Technology

Ricoh also offers a comprehensive suite of powerful hosted technology solutions. Using a consultative approach, your Ricoh eDiscovery Specialist will work with you to find a solution to meet your unique needs, supported by our trusted Project Management Team and eDiscovery experts.
