

Infrastructure as a Service

RICOH
imagine. change.

Ricoh's **Infrastructure as a Service** (IaaS) solution gives you access to our secured, robust and scalable cloud environment, supported by our team of experts who specialize in managing the complex infrastructure required for your applications.

Secured eDiscovery in the cloud

Minimize cybersecurity concerns when you entrust your infrastructure to a partner that consistently delivers solutions that typically exceed even the most robust security compliance requirements. Ricoh's IaaS solution is hosted within our Microsoft® Azure™ cloud environment with enhanced security — where data is not only encrypted as it moves over the network and between applications, but also while it resides (or rests) in storage.

Focus on your core business

Many organizations lack the resources or bandwidth to effectively manage complex infrastructure, while monitoring and administering specialized applications and troubleshooting issues. With Ricoh's IaaS, we will migrate your data and applications seamlessly to our Microsoft® Azure™ cloud environment, provide application support with around-the-clock availability — letting your team focus on what they do best.

On-demand scalability

Whether you require server and storage space that grows organically with your organization's needs, or efficient scalability, we have you covered. Ricoh can provide terabytes of storage in hours, rather than the weeks and added resources it would typically take to plan and execute this in-house. This allows you to add or remove infrastructure to meet your changing business needs.

Demonstrable cost savings

Along with the predictable monthly fee, IaaS helps you avoid the expense and complexity of purchasing, managing and supporting your own physical servers and hardware. This lack of capital expense also reduces your ongoing fixed costs and eliminates the need for the added headcount that would be required to run your infrastructure internally. Just leave the technical expertise to us.

Ricoh, your trusted partner

Our passion for service excellence is backed by an over 80-year history of innovation and a refusal to be limited by tradition. With Ricoh as your trusted partner providing global scale, business maturity and expertise, you can be assured that your data is in safe and reliable hands.

We are more than experts in eDiscovery. We're using our expertise and innovative thinking to drive the digital transformation for our customers.
